Summary

Software and Data professional with 1 year of industry experience in Python development, data analysis, and automation. Proficient in building scalable analytical pipelines, rule-based systems, and AI-powered applications. Strong foundation in computer science with a 9.44 CGPA. Seeking software developer or analyst roles in IT services and technology organizations.

Skills

Programming Languages:	Python, C, R
Frameworks & Libraries:	Pandas, NumPy, TensorFlow, Keras, Matplotlib, Seaborn
Databases:	SQL, MySQL, MongoDB
Concepts:	OOP, SDLC, Agile (Jira), REST APIs, Exploratory Data Analysis
Tools & Platforms:	GitHub, Excel, Power BI, Tableau, ChatGPT, GitHub Copilot

Experience

Junomoneta Finsol Pvt. Ltd. (Fintech)

Aug 2025 – April 2026

Assistant Research Analyst

- Developed Python-based automated pipelines for processing and analysing large-scale real-time and historical financial datasets via REST API integration
- Built automated reporting systems, reducing manual effort by ~35% and improving team turnaround time
- Designed and implemented rule-based analytical frameworks for performance evaluation and risk assessment, ensuring structured and consistent decision-making

IBM SkillsBuild

July 2024 – Aug 2024

Artificial Intelligence Intern

- Developed an AI-powered personalized learning platform for underprivileged children using IBM Watson NLP, improving content accessibility for 100+ users
- Implemented adaptive content recommendation logic using IBM Watson Assistant, increasing personalization accuracy by ~25% over a static baseline

Projects

Rule-Based Analytics & Backtesting Engine

github.com/Rahul-Singh1910

- Built a modular, scalable Python engine processing 15+ years of minute-level financial data; automated KPI generation (win rate, drawdown, Sharpe ratio), cutting manual effort by ~30%
- Technologies: Python, Pandas, NumPy, REST API Integration

Dysgraphia Classification Using CNN

- Designed a deep learning pipeline for image classification and dysgraphia detection; EfficientNetB0 achieved ~89% validation accuracy, outperforming a custom CNN by 11%
- Technologies: Python, TensorFlow/Keras, EfficientNetB0

Retail Sales Data Analysis

- Analyzed 10,000+ sales records to surface revenue trends and customer behavior; delivered 8-chart visualization dashboard improving product profitability analysis
- Technologies: Python (Pandas, Matplotlib, Seaborn)

Portfolio Website

rahulsingh19.netlify.app

- Designed and deployed a personal portfolio website showcasing projects, skills, and experience
- Technologies: HTML, CSS, JavaScript, Netlify

Education

MCKV Institute of Engineering

2021 – 2025

B.Tech in Computer Science and Engineering (Data Science)

CGPA: **9.44 / 10**

Shree Jain Vidyalaya For Boys

2020

WBCHSE (Class XII)

Score: **84.4%**

Certifications

- Software Engineer** – HackerRank (Problem Solving, SQL, REST API)
- SQL (Advanced)** – HackerRank
- TCS iON CareerEdge** – Young Professional
- NISM Series VIII** – Equity Derivatives Certification Examination (SEBI-regulated)
